

Aloe Vera Care

Independent Distributor of Forever Living Product

Forever Active Probiotic®

\$22.80

Microbes are live microorganisms that exist in our bodies and play a role in our general health and wellbeing. While some microbes are bad, the majority are beneficial. These “good bacteria” are called “probiotic,” meaning “for life” in Greek. Forever Living Products recognizes the important role that beneficial microbes play in human health and the need for probiotic supplementation. Designed to promote a healthy digestive system, Forever Active Probiotic is a small, easy-to-swallow beadlet that helps overcome imbalances created by our food and lifestyle choices, which can inadvertently lead to a reduction in the amount of naturally occurring probiotics. Forever Active Probiotic works primarily in the colon where it assists with the process of food digestion, helping to release nutrients for absorption, and contributes positively to normal human growth and development by helping to maintain a balanced and healthy system.

As probiotics themselves are quite fragile, Forever Active Probiotic uses an exclusive, patented encapsulation technology that protects the probiotics then releases a unique combination of six beneficial strains of microbes only after they reach the desired destination of the large intestine. The probiotics in Forever Active Probiotic are derived from Lactobacillus and Bifidobacterium genera; the strains are:

Lactobacillus Acidophilus “inhibits undesirable organisms and helps prevent them from multiplying and colonizing

Bifidobacterium Longum “crowds out bad bacteria to help reduce the frequency of gastrointestinal disorders

Bifidobacterium Lactis “helps lower the body’s pH and further inhibits undesirable bacteria growth

Lactobacillus Rhamnosus “helps to protect the intestinal tract so that the undesirable microorganisms can’t get a foothold

Lactobacillus Bulgaricus “helps to keep the small intestine clean and balanced

Lactobacillus Plantarum “preserves key nutrients, vitamins, and antioxidants to help counteract undesirable substances in our foods

It is the only shelf-stable, 6-strain probiotic on the market today that requires no refrigeration. And what’s great about Forever Active Probiotic is that it works in tandem with our patented aloe vera. Aloe acts as a “prebiotic,” which fosters the growth of and provides the ideal environment for the probiotic to function. So whether your goal is to promote a healthy digestive system or enhance nutrient absorption and immune function, add Forever Active Probiotic to your daily supplement program.

• Promotes a healthy digestive system

• Enhances nutrient absorption and immune function

• Unique combination of 6 beneficial strains of microbes

• No refrigeration needed
